Authentication & Security: OAuth 2.0, OpenID Connect, JWT, Google Sign-In, Supabase Auth, Role-Based Access Control, API key authentication

Deployment & Tools: Git, GitHub, Vercel, Netlify, VS Code, IntelliJ IDEA, Cursor

PROFESSIONAL EXPERIENCE

Client Implementation Engineer

Feb 2025 – Present

Union Bank of Nigeria

Lagos, Nigeria

- Acted as the primary technical liaison between internal product/engineering teams and enterprise stakeholders, translating complex business challenges into technical roadmaps.
- Engineered and deployed custom enterprise software solutions directly into client production environments, ensuring seamless integration with legacy tech stacks and third-party APIs.
- Led end-to-end implementation and onboarding of retail, SME, corporate and merchant clients onto digital banking solutions and API-enabled platforms.
- Engage clients on their integration needs, capture their business requirements and build the services that meet them.
- Position and deliver fund transfer, virtual account and statement APIs to clients, and integrate them within the bank's banking services.
- Coordinated cross-functional delivery across Operations, IT, Product, Compliance and third-party vendors, tracking incidents and escalations to closure and maintaining 90% SLA adherence.
- Troubleshoot and resolved high-priority bugs and production blockers on-site under tight deadlines, maintaining high client satisfaction and system uptime.

Product Implementation Engineer

Dec 2022 – Feb 2025

Ecobank Nigeria Plc

Lagos, Nigeria

- Built and deployed custom software into client production environments, integrating with legacy systems and third-party APIs.
- Onboarded and integrated 20+ large corporate clients annually onto the Enterprise Internet Banking solutions, configuring approval workflows and cross-selling platform features to deepen adoption.
- Resolved technical issues spanning payment processing, transaction monitoring and reconciliation, meeting agreed resolution timelines for client requests and platform issues.
- Gathered detailed customer requirements for the banking services they wanted to build and handed them to the relevant teams for delivery.
- Configured scalable cloud infrastructure tailored to client-specific security, compliance, and performance requirements.

- Supported the delivery, maintenance and enhancement of digital payment solutions for the Business Team.
- Produced transaction volume and value reports for corporate clients, providing data-driven insights for business decisions.

Product Support Officer, Digital Banking Channels

Nov 2020 – Dec 2022

Fidelity Bank

Lagos, Nigeria

- Onboarded clients onto digital banking products including mobile banking apps, debit cards, USSD, POS and ATM platforms, and supported the full product lifecycle.
- Provided first-line technical resolution for onboarding, transaction and UI/UX issues on mobile and internet banking, escalating complex issues to second-level support.
- Resolved high-priority bugs and production blockers under tight deadlines, protecting client satisfaction and system uptime.
- Worked with internal teams and vendors to resolve incidents, document product issues and support enhancements to channel functionality.
- Drove product adoption through customer education, onboarding and multi-channel support strengthening the feedback loop between users and product teams.

Marketing Associate (Contract)

Aug 2020 – Nov 2020

Wema Bank Plc

Lagos, Nigeria

- Onboarded new customers onto ALAT, Wema Bank's digital mobile banking product, while keeping dormant accounts at zero.
- Drove customer acquisition and growth of the deposit portfolio in line with set targets.

SELECTED PROJECTS

TajMart – Online Grocery Store, Nigeria | JavaScript, React, Vite, Supabase, Google Sign-In, Mailgun | [\[live site\]](#) | [\[GitHub URL\]](#)

- Built and deployed a live grocery storefront with category browsing and same-day Lagos delivery ordering.
- Integrated Google Sign-In and Supabase authentication so customer baskets persist across devices, with checkout supporting payment by bank transfer or cash.
- Integrated Mailgun to send receipts by email automatically

PetroVault – Inventory & Procurement Workspace (Demo), USA | TypeScript, React, Vite, Tailwind CSS, Zod | [\[live site\]](#) | [\[GitHub URL\]](#)

- Built a role-based inventory workspace for oilfield materials (tubulars, MRO, chemicals and serialized assets), covering receiving, issuing, transfers and a compliance register.
- Designed operational dashboards showing a shift queue, inventory valuation and alerts for critical items, low stock and expiring or expired certificates, with views scoped to inventory and procurement roles.
- Used Zod schema validation to keep inventory and transaction data consistent.

EDUCATION

Bachelor of Arts, Public Relations and Advertising (Second Class Upper, 2:1)

Jan 2017

Eastern Mediterranean University

- The Dean's List Certificate of High Honour (2015 and 2016)
